

## Directions for glitter/peel-off cards

1. Select the “design” ([peel-off sticker sheet](#)) you want to glitter
2. Cut out the “design” only from the peel-off sticker sheet
3. Remove any excess peel off material from around the design.
4. Use the transfer tape ([Magic Tape transfer sheets](#)) to slowly remove ALL pieces of the design you want to use. Rub the design with a bone folder into the transfer tape so all parts of the design will attach to the transfer. If some of the parts of the design are stubborn, push the design piece into the transfer tape as you BEND the paper backing away from the design. The design will pull away from the paper backing and easily stick to the transfer tape.
5. Put a piece of tape ([double sided clear adhesive tape](#)”) on a piece of white cardstock.
6. Transfer your “design” from the transfer sheet to the taped area on the white cardstock. ”. It will easily transfer to the two sided tape.
7. You need to decide if you want to use the area around your design as part of your card or if you only want to cut out the design after you glitter it.
8. You need to put glitter around your design so you can handle the cardstock. (Carefully choose a complimentary color if you are using the entire piece of cardstock with the design for a card or a color you do not care for if you are going to cut out the design.)
9. Choose the [Micro Fine Glitter](#) you want to use,
10. Pull out the parts of the design you want to glitter using [fine point tweezers](#) then add glitter from the darkest color to the lightest color until the design is complete, making sure you do not pull out the design outline. You can use as many different glitter colors as you want.
11. Cut out ([scissors](#)) the glittered design and put it on your card.
